EDUCATION

- **Parul Institute of Engineering and Technology** *2022 - Present*
BTech Computer Science - CGPA: 7.95 *Vadodara, Gujarat*

- **St. Mont Fort School** *2022*
CBSE XII — Result: 70.0 % *Bhopal, MP*

- **St. Francis Convent Sr. Sec. School** *2020*
CBSE X — Result: 83% *Raisen, MP*

SKILLS

- **Programming Languages:** C, C++, Java, Python (Intermediate)
- **Web Development and Tools:** HTML, CSS, JavaScript, ReactJs, Django,Eclipse, Visual Studio Code, GitHub
- **Databases:** MySQL, Postgresql, Database Design, Query Optimization
- **Coding Platforms:** Leetcode, GeeksforGeeks *(Problem Solving, Data Structures and Algorithms)*

PROJECTS

- **Alua Meeting - Real-time Video Conferencing Platform** *Nov-2024*
Tools: Django, HTML, CSS, Integrated API, User authentication Link
  - Developed a scalable video conferencing application using Django's **Model-Template-View (MTV) architecture**.
  - Implemented **JWT-based user authentication** for secure login and signup, ensuring **data integrity** and **access control**.
  - Integrated **WebRTC API with Django Channels** for real-time video communication and signaling.
  - Built features like **screen sharing** and **collaborative whiteboard** to enhance **user interaction** during calls.

- **Skycast Weather - Comprehensive Weather Forecasting App** *Sept-2024*
Tools: ReactJs, HTML,CSS, React Router, JavaScript Link
  - Engineered a a **React.js**-based **weather forecasting application**, utilizing a **mobile-first, responsive design** to ensure optimal performance on various devices.
  - Integrated the **OpenWeatherMap API** to dynamically retrieve **weather data**, including **temperature**, **humidity**, and **wind speed**, with a focus on **data accuracy** and **real-time updates**.
  - Implemented **geolocation** to automatically detect the user's location and **search functionality** to allow users to input city names for location-specific weather information.
  - Leveraged **React Router** to manage **client-side routing**, enabling seamless transitions between app components without page reloads.

- **Dincharya - Personal Task Management Web Application** *Aug- 2024*
Tools: ReactJs, HTML, CSS, React Router, JavaScript, Vercel Link
  - Built a **task management app** using **React.js** with full **CRUD functionality** for tasks. .
  - Integrated **React Router** for **navigation** between pages.
  - Used **LocalStorage** to **persist data** across sessions.
  - Deployed the application on **Vercel** for optimized **performance** and **accessibility**.

POSITION OF RESPONSIBILITY

-Coordinator and Host, CDC, Parul University

  - Coordinated career development workshops and events to enhance students' professional skills, including resume building and interview preparation. Managed guest speaker sessions and led a team of volunteers to ensure smooth execution.

CERTIFICATIONS

- Successfully completed **Database and SQL Certification** by Infosys-Springboard. Link
- Successfully completed **NPTEL** exam on **Computer Networks and Internet Protocols** conducted by **IIT Kharagpur.** Link
-Participated in **Hack N Droid** (**Hackathon**), gaining hands-on experience in **Android development, problem-solving, and collaboration** organized by Vellore Insitute of Technology, Chennai. Link
-Participated in **Felicity '25 Hackathon** as part of **Team Syntax Slayers**, collaborating on innovative problem-solving and development organized by IIIT Hyderabad. Link
