EDUCATION

Vellore Institute of Technology, Vellore

B.Tech. - Computer Science and Engineering (Information Security)

September 2022 - Present

CGPA: 9.08

PROJECTS

CodePulse - Personalized Coding Progress Tracker

React.js, Java, Spring Boot, MySQL, JWT, Google OAuth 2.0, REST APIs ([GitHub](#)) ([Live Site](#))

- Engineered a full-stack coding progress tracker application using React.js frontend and Spring Boot backend with MySQL database, implementing RESTful API architecture, JWT and Google OAuth 2.0 authentication, responsive design with Tailwind CSS, and secure user management for personalized study tracking.
- Implemented comprehensive platform featuring intelligent study plan generator, interactive progress dashboard with statistical analytics, task management system with day-by-day scheduling, spaced repetition learning algorithm, note-taking interface, theme switching, Spring Security integration and BCrypt password hashing.

RailCare - Smart Complaint Resolution Platform with Real-Time Tracking

React.js, Java, Spring Boot, MySQL, REST APIs ([GitHub](#)) ([Live Site](#))

- Architected a smart railway complaint resolution platform for the auto-classification of complaints with high accuracy across multiple departments, significantly reducing manual complaint sorting time.
- Designed separate portals for users and staff, featuring real-time synchronization that enables users to track live status updates while allowing staff to instantly manage the entire complaint creation and resolution workflow.

ExpenseFlow - AI Powered Budget Manager

React.js, Java, Spring Boot, MySQL, OpenAI API, Tesseract.js (OCR processing) ([GitHub](#)) ([Live Site](#))

- Architected a full-stack personal finance tracker with OpenAI API integration for intelligent receipt scanning and expense categorization.
- Implemented multi-payment source tracking (bank/cash/UPI transactions), secure user authentication, CSV export functionality, and real-time financial analytics dashboard.

ResumeForge - Real-Time LaTeX Resume Generator

React.js, Tailwind CSS, External LaTeX API ([GitHub](#)) ([Live Site](#))

- Created a real-time resume generator with dynamic form input, custom section reordering, and live PDF preview via external LaTeX API integration
- Engineered end-to-end PDF generation pipeline that captures user form data in React, transforms input into JSON structures for automated LaTeX template injection, and integrates external compilation API via Axios HTTP client with asynchronous processing, error handling, and optimized file stream delivery.

EXPERIENCE

Indian Railway Catering and Tourism Corporation Ltd. (IRCTC) [🔗](#)

May 2025 – June 2025

IT Intern

New Delhi

- Devised an intelligent complaint management system with weighted keyword-based categorization of complaints, enabling effective auto-classification with high accuracy. Developed user & admin dashboards with real-time tracking capabilities.
- Actively Collaborated with IRCTC Software Development Team across Web Services, Portal Systems, Payment Gateway, and Network Operations Center, gaining insights into administrative and technical workflows.

SKILLS

Expertise: Data Structures & Algorithms, Full-Stack Web Development, Cloud Computing (AWS)

Languages: Java, JavaScript, SQL, HTML/CSS

Frameworks & Technologies: React.js, Spring Boot, Spring Security, Spring Data JPA, REST APIs

Developer Tools: VS Code, Git, GitHub, MySQL, AWS

Professional Skills: Leadership, Management, Teamwork, Communication, Problem Solving & Analytical Thinking

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner - *Amazon Web Services (AWS)* [🔗](#)
- AI-900: Microsoft Azure AI Fundamentals - *Microsoft* [🔗](#)
- Mastering Data Structures and Algorithms using C and C++ - *Udemy* [🔗](#)
- Solved 500+ algorithmic problems across platforms like LeetCode, demonstrating strong problem-solving skills. [🔗](#)
