Summary

Aspiring Software Development Engineer (SDE) with strong foundations in **Object-Oriented Programming (OOP)**, **System Design**, and **Data Structures & Algorithms (DSA)**. Proficient in **Python**, and **Java**, with demonstrated problem-solving skills and aptitude developed through solving **500+ coding problems** on platforms like **LeetCode**, **CodeChef**, and **GeeksforGeeks**.

Experienced in backend and web development using **Django** and **SQL/MongoDB**, with interest in **AI/ML** and practical experience integrating ML models into real-time applications using **Streamlit**. Skilled in designing clean, scalable systems and applying performance optimization techniques.

Contributor to **open source**, active in **competitive programming**, and proficient with **Git & version control**.

Passionate about building reliable, user-focused solutions that blend software engineering principles with intelligent automation.

Skills

Technical: Python (NumPy, Pandas, Scikit-learn), Java, JavaScript, Django, HTML, CSS, SQL (MySQL), NoSQL (MongoDB), Streamlit, Git, GitHub, Power BI.

Cloud Technologies: Microsoft Azure, Google Cloud Platform (GCP).

Education

Parul University , BTech CSE	Oct 2022 – May 2026
• GPA: 7.74/10.0	
Gouthami Junior Collage , Intermediate MPC	Jun 2020 - Mar 2022
• Percentage: 81.70 / 100	
SPR High School , School	Jun 2012 - Mar 2020
• CGPA: 9.70 / 10	

Projects

SnapHire

github.com/PraneethKandukuriii/SnapHire

- Building an on-demand booking platform where users can instantly hire reel makers, photographers, and videographers. The platform will support real-time availability checks, location-based matching, and secure payments.
- Tools Used: MongoDB, Express.js, React, Node.js, Postman

Safe Mail Scan

github.com/PraneethKandukuriii/SafeMailScan

- Developed a **machine learning-based web app** with **90%+ accuracy** using **Scikit-learn** to detect phishing emails, integrated with **Streamlit** for a user-friendly interface.
- Tools Used: Python, Scikit-learn, Streamlit, Machine Learning

College Prediction App

github.com/PraneethKandukuriii/CollegePredictionApp

- Built a machine learning-based web app that predicts suitable colleges based on user inputs like exam scores, preferences, and eligibility criteria.
- Tools Used: Python, Machine Learning, Scikit-learn, Streamlit

Certifications

- Infosys Certified in Database and SQL — foundational for backend development.
- Python Essentials 1 from Cisco — essential for backend scripting and ML integration.
- Tata Group Job Simulation: Data Visualization – gained insights into presenting business data effectively.
- NPTEL: Computer Networks and Internet Protocol — strengthened understanding of web communication protocols.
- Certified Apple Teacher — recognized for creative teaching and digital literacy.

Personal Interests / Hobbies

- Editing photos and videos to craft engaging visual narratives
- Capturing candid moments through nature and street photography
- Writing and reading about AI advancements and emerging technologies
- Participating in competitive coding challenges and hackathons
